

SITE ENGINEER(S) – MIDWEST REGION

About Niaron Ltd

Niaron Ltd. are a multi-disciplinary civil engineering and utilities contractor operating nationwide in the public and private sector with offices located in Limerick and Ashbourne, Co. Meath. We have several long-standing clients providing repeat business and we have experienced significant growth in the past 5 years, we are looking to recruit a number of Site Engineers in the Midwest Region. This is a fantastic opportunity for an established site engineer or exceptional graduate engineer ready to take the next step while joining an exceptional business.

The Role

The Site Engineer role reporting to the Project Manager (PM) will be based on one of our sites in the Midwest Region. The Site Engineer will be responsible for assisting the PM with all aspects of their role which includes strict management of all health, safety, environment and quality (HSEQ) procedures and day to day management of the project.

As a Site Engineer you are required to have a good knowledge and understanding of civil engineering and utility operations including a good knowledge of underground electrical networks, this should underpin an understanding of the requirements and needs of our extremely successful business unit. The role will involve an initial assessment of assigned tasks, planning the works with the PM including identifying any traffic management requirements, scheduling crews and construction of the works.

The duties of the Site Engineer will include:

- Ensuring compliance with the HSEQ requirements for every site operation.
- Undertake tasks relating to safety, resource allocation, setting out, traffic management and supervision arrangements as assigned by the PM.
- Ensure adherence with project drawings and specifications for all works being delivered by our inhouse teams.
- Always work within the sustainability procurement policy of the business.
- Agreeing delivery times to meet the project or framework timelines.
- Keeping detailed records and maintaining well-organised work schedules.
- Assessing the reliability of sub-contractors and suppliers in conjunction with the PM.
- Dealing effectively with challenges within the site crews.
- Providing instruction to site personnel and upward liaison with the PM.
- Liaising closely with the PM to ensure schedules are received in a timely manner to plan all site activities.
- Negotiating and agreeing the most favourable construction sequence as works advance.

Experience, Knowledge and Qualifications

- Excellent knowledge of HSEQ requirements.
- Demonstrated analytical skills and ability to interpret site information.
- Good knowledge of the electrical network including HV, MV and LV.

CONSTRUCTION & CIVIL ENGINEERING SERVICES

- Ability to communicate with peers both written and verbal.
- Willing to work independently or as part of a team.
- Good understanding of the civil engineering and utilities business.
- Enjoys the requirement to work in the outdoor environment.
- Minimum 3 year's experience in a Site Engineer role.
- Required:
 - Safepass
 - Manual Handling
 - Full Clean Driving licence
- Training required but not essential:
 - Sign, Lighting & Guarding at Roadworks.
 - Location of Underground Services.

Opportunities

- Team building and leadership.
- Well established procedures to work within.
- Opportunity to join an established business in the region.
- Being part of promoting the company culture and values.
- Contribute to a dynamic team.
- Self-development.
